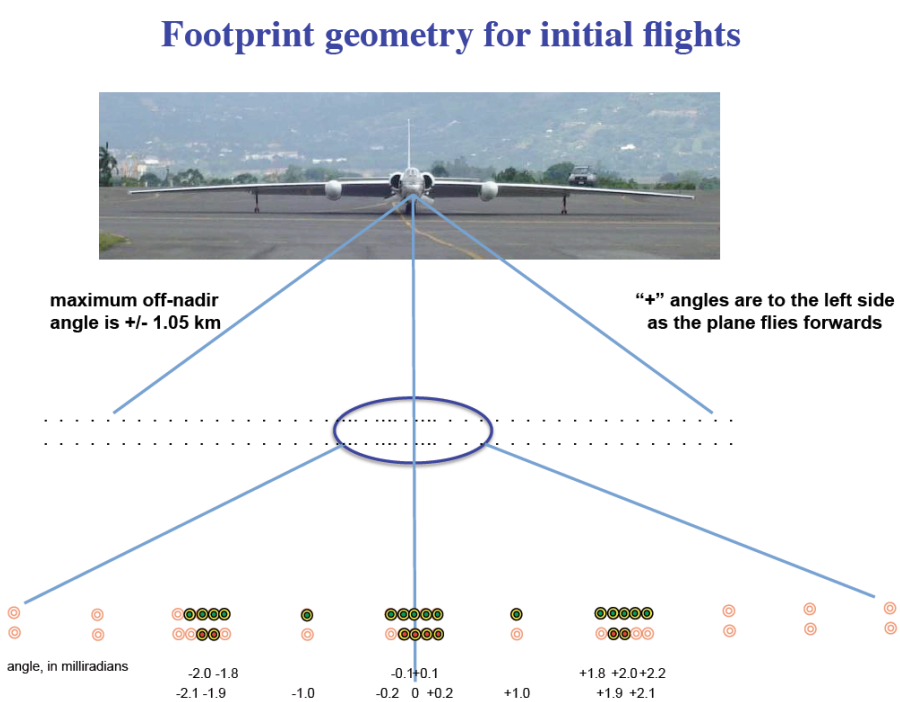
03/28/2011

Mission: 'Sierras'

Weather: Clear
Comments: MABEL continuously power-cycled due to thermal thresholds. Flight is unusable.

Sample rate: 5 kHz
Energy levels throughout IR channels ONLY: variable: some beams were filtered to simulate ICESat-2 'weak' beams (see **colored** channels below).
FOV: 'Cluster FOV' (see image below)



Angle to Channel map:
